The Budget Message

Fiscal Year 2024-2025

Dear Mayor, City Councilors, Budget Committee Members, and Community Members:

I am pleased to submit to you for your consideration a proposed budget for the fiscal year 2024-2025. The purpose of this budget message is to provide both internal and external partners with a detailed picture regarding the state of the City of Sheridan's finances, as well as guidance for the upcoming fiscal year's needs. Oregon Budget Law states that a local government's budget will be balanced. Staff has proposed a balanced budget for the Budget Committee's review.

As always, I rely heavily on staff input and Council direction to formulate the budget. Through this process, a budget was developed that is centered on economic development, supporting existing programs, becoming self-reliant, improvements to the City's infrastructure, and concentration on preventative maintenance. This proposed budget contains a lot of projects that will require staff coordination and work, and the same from the Council. The budget also relies heavily on grant funding for specific studies and projects.

The Meaning of a Budget

Annually, local government leaders are charged with approving and adopting a budget. This process is typically time-consuming yet thought provoking. The budget is important because it involves a lot of consideration for the next fiscal year, as well as the future. When done well, city budgets can help to keep everyone working harmoniously. Budgets are powerful tools for running an effective and efficient government.

As I see it, this budget document is intended to serve four main purposes:

- To define public policy set forth by the City Council and as seen in their goals.
- To serve as a guide for management to aid in the control of financial resources.
- To outline the City's financial resources allocation plan for the fiscal year, illustrating projected revenues and appropriations that are to be funded.

- To serve as the City's fundamental communications document for the community of Sheridan, who wish to understand how the City operates and provides its services and the methods and amounts used to finance those operations and services.

Sheridan's Population

The Portland State Population Research Center sets the population for cities. Below is a short chart showing the changes in population over time. We believe that it is at least partly due to the Federal Correction Institution (FCI) reducing the number of inmates due to Covid health measures.

| Year | Population |
|------|------------|
| 2023 | 5,987 |
| 2022 | 6,161 |
| 2021 | 6,377 |

In 2022, about 1,606 of the population were imprisoned at the Federal Correctional Institution. Sheridan's Average Annual Growth Rate between 2000-2010 was just 1.1%, which was on the slower side for cities in Yamhill County. The population is projected to hit 7,232 by 2045 and 8,389 by 2070, which is a less than one percent growth for each 20-year period. This is also slower in comparison to other small Yamhill County cities. The city is currently hampered by land restraints that make it difficult for development and in this budget, there are efforts being made to get the necessary reports for meeting these population projections. Without growth in residential, commercial, or industrial zones there will be little increase in property taxes, perhaps lower than the rate of inflation.

The Local Stats

In 2020, the US Census was completed, although there are some contentions around the accuracy of the stats that were collected due to politics and the restrictions created by the pandemic. The median household income is reported at \$56,989 which is \$75,657 for the State of Oregon, or about 24% lower than the State. The median age in Sheridan is 38.9 years old; compared to 40.5 years old for the State's median age. About 23.8% of the residents have a bachelor's degree, or higher compared to 36.3% of Oregon's total population has a bachelor's degree or higher. Also, Sheridan's disabled population is 23.8%, compared to the State's disabled population of 15.8%.

Budget Basics

This fiscal year the total of all funds combined is roughly \$19 million, very small change from last year of roughly \$19.2 million. We will continue to see a decline as we spend several large grants. Please note that each fund is separated because there are budget laws, state statutes, and local codes that limit how revenues are collected, and expenditures are spent. Each fund operates as its own entity, this means that monies between funds cannot be comingled.

In municipal budgeting, revenues are often called *resources* and expenditures are called *requirements*. Municipal budgeting educational materials can be found on the State of Oregon Department of Revenue’s Local Budget Law website: <https://www.oregon.gov/DOR/programs/property/Pages/local-budget.aspx>

Discussion of Property Taxes in Relation to Sheridan’s Budget

In the 1990s, Measures 5, 47, and 50 established a permanent tax rate on local governments, and this is still in effect today. The *Oregonian* created a helpful short video to help explain Oregon’s property tax system’s history and complexities. It is nearly four minutes long and can be found at: <https://www.youtube.com/watch?v=gtalhnmxnZU>. Cities cannot change their permanent tax rate. Instead, taxing districts, like the City of Sheridan, have increased the valuation of the city to gain more property taxes, and typically adding businesses or residential homes is the way to boost the biggest value. The City of Sheridan and the City of Willamina partnered to make an Enterprise Zone, which allows certain industrial businesses to alleviate all taxes for between 3 to 5 years. There are many restrictions on this opportunity and the City of Sheridan uses its partnership with SEDCOR to manage and recruit businesses to take advantage of the Enterprise Zone. At the present time there are no businesses using the Enterprise Zone. The City will work with its partners to renew the Enterprise Zone in hopes of recruiting business.

Estimating Sheridan's Property Tax Collection

Sheridan’s permanent property tax rate is \$2.1307 per \$1,000 of assessed value. The City’s estimated Assessed Value for 2023-2024 was \$289,220,407. However, in 2023-2024 the City has \$18,074,857 worth of properties that are exempt from taxation, like schools or properties owned by a non-profit or government. The taxable value is the amount that *is* taxed, the Assessed Value is the amount that is available for taxing. (Assessed Value – Exempt Value = Taxable Value)

| City of Sheridan’s Taxable Value | | |
|----------------------------------|---------------|--------------------|
| Fiscal Year Period | Taxable Value | % Change Over Time |
| 2024-2025 | TBD | |
| 2023-2024 | 271,145,550 | 9.9% |
| 2022-2023 | 263,083,972 | 5.2% |
| 2021-2022 | 250,026,362 | 1.3% |
| 2020-2021 | 246,926,348 | 4.7% |
| 2019-2020 | 235,840,828 | 6.5% |
| 2018-2019 | 221,498,981 | X |

Yamhill County's tax collection rate is roughly 94%, this means that 6% will not pay their property taxes on time. However, the budget does estimate for a larger portion of uncollectable to remove issues for overbudgeting. Under the General Fund there are lines to collect current property taxes and another line to collect the back taxes. Using these models, we are estimating collecting \$520,000 in current property taxes. Assessed value of $(\$263,083,972 / \$1,000) \times \$2.1307 = \$560,553$; however, it is critical to estimate revenues conservatively, we've estimated for a collection rate of 93%, which should allow for savings for the next fiscal year.

This budget builds in the concept of estimating high for expenses, and low for revenues in all funds. At the close of every fiscal year, all the money is put back into the fund's beginning balance, so overestimation of expenditures works as a "savings" plan.

A Comparison of Other Yamhill County Small Cities

| District | 2023-2024 Taxable Value | City Permanent Tax Rate |
|-------------------|-------------------------|-------------------------|
| City of Sheridan | 271,145,550 | \$2.1307 |
| City of Lafayette | 301,920,464 | \$3.4857 |
| City of Carlton | 239,207,461 | \$5.3756 |
| City of Amity | 102,609,542 | \$3.6105 |
| City of Dundee | 364,187,465 | \$2.8413 |
| City of Dayton | 159,743,377 | \$1.7057 |
| City of Willamina | 84,680,115 | \$4.2039 |

It is my recommendation that the City's leadership focus on adopting policies that increase the City's assessed value. This can be accomplished by recruiting business and/or residential homes. However, before this can occur the City needs to undergo a review of its Development Code and complete updated Master Plans for Water, Sewer, Transportation, Stormwater, and Parks as well as complete the required plans for an Urban Growth Boundary (UGB) Expansion. This will prepare the City for growth for the next 20 years. This budget tackles the Master Plan for the Water, Sewer, Parks, and Storm Water. It also provides for some of the costs for the UGB required studies. However, the City must continue to search for grants to help offset the costs of these engineered and planning studies.

Estimations, Assumptions, and Using Plans

Being fiscally conservative is *critical* to making Sheridan's budget work. At this point in history, this is especially true due to the reverberating effects the pandemic has had (and is still having) on the world's economy, as we still see expenses high for construction, some supplies, and gas.

The staff got price quotes for projects so that the estimates for supplies, services, and materials are practical. All revenues that the City receives are estimated conservatively, which helps to reduce expenditures, set priorities, and build savings for the future. Staff also estimate the beginning balances of funds conservatively.

The City of Sheridan provides some of the most fundamental services for human survival including clean water and waste removal, as well as safe parks and streets, police protection, and mitigation of storm water and flooding. These critical systems continue to age, and this fiscal year we have funds to engineer deteriorating infrastructure as well as to do some of the repair work. We will also commit ourselves to doing more preventative maintenance. If we don't, we will see higher costs in the future as we will need to fund for full replacement of infrastructure and equipment. In this budget, we are continuing to work on repairs and maintenance of our systems for preservation and to practice conservation of money.

Thoughts on this Year's Budget

Overall, this fiscal year is focused on analyzation. By this I mean that staff and the council will take on in-depth studies for water, sewer, stormwater, transportation and parks with the goal of creating master plans for each. The sewer and stormwater are only available for partial grant funding. The water master plan is funded by a grant from the County. The park master plan will be done mostly in-house. The transportation master plan will only be done if funded by a grant. Additionally, there are anticipated grants to fund more studies/reports. One for a point source water protection plan (drinking water) and the other for brownfield reports (polluted lands in town). Lastly, there are several other plans that are expected to be done including a forest management plan, community buildings plan, and all the necessary reports ramping up for an urban growth boundary expansion in the next few years.

It will take a few years for the City to complete all these studies and reports. Through the course of each report, we will learn more about each system and its needs to support future growth, which will allow for smart growth. Funding for growth will be the largest challenge. As the growth happens it will add to the tax base by increasing houses and buildings; additionally, each new property and utility account will contribute to the investments needed to secure the City's future. The visual changes that we all desire will continue to be incremental changes because having a plan is necessary to have orderly growth. The visual changes will continue to be focused on the parks system and supporting labor the local nonprofit organizations to help encourage downtown revitalization.

Labor costs are always analyzed and scrutinized, as they should be. But a few words of caution about discussion of labor, 1) the City Council is the body that can make adjustments to the budget for labor costs (not the responsibility of the Budget Committee) and 2) be sure you remember that as you talk about labor costs there are real people and real families that depend on the city for a job. Most of our staff live in Sheridan, the West Valley, but all within minutes of Sheridan. We are a part of the community. Our staff are happy to be public servants and do understand that the wage is not comparable to the private sector's wage, which makes recruitment a challenge. We don't want Sheridan to be a "jumping off place" for people to get trained on our dime and then leave for a better paying job. It is important to offer a competitive wage and benefits.

Utility Rate Forecasting

For years, Donovan Enterprises has provided the City with rate studies and forecasting models for the Water, Sewer, and Storm rates. The Council continues to adopt his recommendation and this budget is based on those rates. The recommendations come to the Council annually in August, although the increase for customers doesn't start until January of each year.

System Development Charges

Donovan Enterprises also provides an analysis of the City's System Development Charges (SDCs) for the water, wastewater, storm, transportation, and park systems. Every time the analysis shows that the City of Sheridan's rates are lower than other cities. Although SDCs should not be based alone on a comparison to other cities, it is important to know where a city ranks. SDCs are money that a developer pays to contribute to the growth from their development. Part of the SDC is to pay for their share toward the existing system and the other part for the future infrastructure that is needed to manage the growth. The State requires that cities plan for at least 20 years of growth and provide the infrastructure for this growth, without SDCs that match the cost for future infrastructure the current rate payers are forced to pay for growth. The City of Sheridan's Charter has a restriction that does not allow for rate increases without voter approval.

General Fund – Change is Needed!

The General Fund provides funding for administration, library, parks, court and the municipal court judge, policing, dispatch services, code enforcement, planning/building department, economic development, among other services. This year the most reliable revenues do not cover the basic costs to fund the general fund, by about \$200,000. This is a very raw stripped-down estimate, but it is absolutely necessary when putting this budget together. It is my estimate that this is the last year that the General Fund will balance without cuts to services or labor. The police cost alone is more than the amount of tax revenue that the City brings in. Current tax revenue is estimated to be \$520,000 and the police contracted amount is \$546,147, adding in dispatch increases the total roughly \$65,000. These two services equal an estimated \$611,147, which is about \$91,000 short of the tax revenue that is brought in. The City Council will need to address the cost of the policing and revenues soon.

Note for next year, (caution it may get worse) at this time the police union contract is not negotiated and because of this, the County is only charging the contract cities a 3% increase for this year. The increase may be passed along next year. Meaning there could be larger-than-normal percentage increase in the police cost for the Fiscal Year 2025-2026.

Streets

The Street Fund is tapped out. The only revenue sources for this Fund are the City's proportionate share of gas taxes and its allotment of the ODOT Exchange Fund. We have already received all of the ODOT Exchange Funds for the next year. The gas tax revenue is holding steady. So many are hopeful that Sheridan Road will be completely done in the next year, but it is looking more likely that the City

Council will have to consider taking out a loan for this project, if it cannot secure more grant funds. It could also be that the project continues over a two fiscal year cycle to help with the funding issues. The water repairs are fully funded by a grant, the sewer repairs can be afforded in the Sewer Fund, but the street improvements are about \$2,500,000 short of funding the entire project. The City applied for federal transportation funds through Representative Andrea Salinas' Office, but the City will not be awarded this money. Leadership will continue to apply for grants to fund Sheridan Road.

Grants: *A complete chart of the funds and levels of spending is included in the Budget.*

- **ARPA:** American Rescue Plan Act, this is about \$1.3 million in federal money. The City Council will use the funds for the Sheridan Road project. This money is accounted for in the General Fund in its own resource and expense line.
- **Water Master Plan:** This is a grant that was received from Yamhill County, as part of their ARPA funds. The grant is for \$185,000 and it was budgeted for in the Water Fund. The City does have to contribute some funds, which can happen in the form of labor.
- **Water Loop on Sheridan Road:** The City received \$1 million from Yamhill County from their ARPA funds. This project will connect the water line on Sheridan Road and southeast Jefferson Street, boring under the railroad. It will boost the fire pressure on this road, allowing for growth and bringing higher quality water to the area. This grant is accounted for in the Water Fund. Ultimately, this is a huge potential for economic development on Sheridan Road by bringing a higher water pressure.
- **Southside Park:** The City received a grant from the State of Oregon's Parks Department for nearly \$650,000 for a variety of improvements to the Southside Park. Items are being ordered and some installed during the summer season. A match of 40% is required with this grant but can be in the form of labor or donations.
- **Brownfield Studies:** The budget anticipates receiving \$60,000 to do brownfield studies to understand potential contamination of dirt.
- **Point Water Source Protection Grant:** The budget anticipates receiving \$50,000 for outside engineering study to collaboratively work with industrial and commercial businesses that are nearby the Yamhill River to understand any potential contamination into the River that in an emergency would have a detrimental effect on the water quality of the River.
- **Stoney Mountain Facility Plan:** The budget anticipates receiving \$50,000 for an in-depth study of how to transmit water from the Stoney Mountain Reservoir to the city's drinking water system. The Council has ranked this as a high priority. The \$50,000 may not be enough to cover the costs of this study, so the Water Fund engineering contains \$50,000 to ensure that there is enough money to get the study completed this year. This study will help the City leverage federal and state funds for the project in the future.

The Council's Strategic Plan Year 1: The Beginning

Goal 1: Revitalize and Recruit Downtown Businesses

The City of Sheridan staff is charged up and ready to take on the tasks listed in the Sheridan City Council's Strategic Plan, adopted in March 2024. The Staff will become hyper-focused on delivering the Council completed projects by the Target Goal of December 2026. To accomplish these goals, I have taken each one and planned the steps, and estimated the funds needed for completion. Some of the goals will take at least two years to accomplish partly because the funds needed are too great. With this, the Council will need to decide if they ask our voters for funds or apply for grant money. The other option is to continue to save money for the goal and complete it at a later date. Below you will find a simplified version of the Sheridan 2024-2026 Strategic Plan along with tasks to complete for this year with the funds needed for this fiscal year. To see the whole Plan visit the City's website: [Res 2024-E Adopting the Strategic Plan.pdf \(cityofsheridanor.com\)](#)

To begin this goal, it is necessary to start with a Downtown Revitalization Plan (DRP). The funding strategy for this is to apply for a Community Block Development Grant (CDBG) with the Business Oregon for \$50,000. Working through this DRP will layout a process for the Business Recruitment Plan. Contacting businesses does not have a cost but will require Council to determine the purpose of the interaction but there will inevitably be communication with businesses during the DRP. Increase downtown parking will also be addressed during the DRP and it's a high priority to the Parks and Recreation Committee to establish parking at the north end of Morgan Street for the Riverfront Park area to accommodate downtown commerce and river recreation.

The Metrics for this goal also involve cooperation with our local nonprofits like the Chamber, Rotary, and the Sheridan Revitalization Movement (SRM). During the DRP these groups will be involved, and it will help give the groups direction for their pieces of the revitalization and business recruitment for our downtown; working in tandem we will be more successful.

The City Planner is currently writing a grant to the State for a Transportation Growth Management (TGM) Grant that will fund the City to complete an overhaul of its Development Code. This will hit on all the items that refer to changing zoning whether it be for housing, industrial, and commercial.

It will also help with the desire to complete an urban growth boundary expansion project, bringing in more developable land into the City. The City is also applying for assistance to complete the necessary pre-reports for a UGB like a transportation system plan, housing capacity analysis, economic opportunity analysis, and a buildable lands inventory. These reports could take a few years to complete and a UGB can take many years to complete. Currently the City is completing a water system master plan (grant funded) and in this fiscal year the Sewer fund is providing for the engineering costs for completion of a wastewater facilities plan and a stormwater master plan. All of the utility master/facility plans must be updated quickly so that the City can get going on its Urban Growth Boundary Expansion project.

Sheridan Road is a big priority for the Council and the Staff. The estimate is about \$9.4 million dollars. The funding for the water line improvements is in place and will commence soon. The funding for the surface improvements is short at about \$2.5 million. Most of the funding for the surface improvements is from the City's American Rescue Plan Act (ARPA) money of apx. \$1.3 million, a few years ODOT Exchange money, and a small portion of the City's proportionate share of gas tax dollars will be used. (However, most of the gas tax dollars goes to pay for the regular/fixed street costs, like the electricity for the streetlights. Although the City is converting streetlights to LED, it is also adding new lights to areas that have been without.)

Goal 2: Ensure a Safe and Resilient Community

Stoney Mountain Reservoir was constructed and completed in the early 2000's and is a 30-million-gallon water reservoir (dam) that was designed to remove the City from using the Yamhill River for its summertime drinking water source. The City holds the water rights for this project. The next step is a Facility Plan to study specifically how to bring Stoney Mountain Reservoir "online". This means that engineers work with City Public Works and City Manager to recommend to Council the best plan how to hook up the reservoir to the City's drinking water system. This was analyzed over 20 years ago, but a lot has changed in technology since then. The State of Oregon has indicated that it would help the City fund this study through a CDBG. So, this budget includes a grant for \$50,000 to pay for this study. The Mayor, Council and Staff will continue communications to the public about the Reservoir and its importance.

In early 2024 the Council approved the City staff working with a forester to do produce a forest management plan for the Stoney Mountain Reservoir area. The City owns over 100 acres around the Reservoir, which is to the NW of the City and surrounded by forestland. With heightened attention in our area about wildfire, the City has prioritized protecting the Stoney Mountain asset and for this reason having a forester do an evaluation is a priority. The forester is extremely familiar with our location and the best practices of working in an active watershed. The budget pays for the forestry management plan. The budget also includes a revenue line for logging, this is in case there is a recommendation to log some of the forest, and the revenue line creates transparency to the public about how much money was generated from the logging. The intent is to have the logging help to fund the Stoney Mountain project, although not a full funding source.

The Budget includes the potential of selling city properties, if this happens the revenue will come into the General Fund under the Community Development line. It is unknown if the Council will go forward with selling any land, and therefore the amount is also unpredictable. For these reasons, there is \$300,000 in the revenue line called Community Development and offset at the same amount in the expense line with the same name. The Council will have to decide how it wants to expend, or save, the funds.

This budget year is highly focused on reports and plans that require a lot of staff working jointly with engineers and planners.

The City did not rank high for a Safe Routes to School Grant for construction and it was denied the engineering grant for Safe Routes to School. These applications are bi-annually and in the meantime the City staff will work to make a more competitive application for the future.

This budget does contain money to complete a Pavement Management Conditions Report, which will provide a street inventory and help the Council, Staff, and public have a baseline understanding of the condition of the city streets. This is another report that will highly involve the City Staff but completed using a contractor. The Council will hear a presentation on the findings and the report will become essential for future budgets.

Code enforcement and compliance continues to be a priority for the Council. This budget allows for a more money dedicated to the program. Dumping old RVs and cars continues to be an expensive battle. The City has partnered with a tow company that can move these vehicles and they've also secured a private contract for local storage. However, the costs for the tows, but especially for the dismantling of RVs, are expensive. Many of the RVs are invested with illegal materials or asbestos which require special licensing, disposable, and equipment; all driving up the costs. The budget also allows for several code-related activities for the year and continues offering the popular Recycle Station (located at the east end of Sheridan Road). The Recycle Station is only open to Sheridan residents, since it is paid through General Fund money.

Goal 3: Increase Community Livability

Communication with community members is important to any government, but especially with local governments. Increasing the livability of the City is centered on having a better understanding of what is important to all community members. The staff will collaborate with the Council to develop an annual City-Wide Survey that will serve as a gauge for community satisfaction and give direction about community priorities. The advertising budget in the General Fund was increased to enhance communication and the Water, Sewer, and General Funds will contribute to an electronic reader board to get information out to the public. There is also money in the budget to hold a Town Hall regarding a topic(s) of future selection by the Council.

It has become apparent that the city is outgrowing its buildings. The best way to proceed is to determine what services community members value and what services they would like added over the next 20-50 years. The City staff work with the Mid-Willamette Valley Council of Governments (COG) to interact with the public, staff, community groups, City Committees, and the Council to create a plan for future community buildings. The General Fund continues to set aside a small amount of money to fund these future buildings. This year, the goal is to start the engagement with the public to work on a Community Buildings Plan.

The City's central Public Works building is dilapidated and would not be functional in a large-scale emergency event (i.e., earthquake). Starting in Fiscal Year 2022-2023 the City's Budget allotted money toward a new Public Works Building. This year the staff plans to work with the Council to select an architect to begin the drawing of the future Public Works site.

The Sheridan Parks and Recreation Committee (PRC) is an active and hardworking group. Lots of emphasis is being placed on maintaining our current parks and adding services. Parks are a fundamental part of livability, allowing people a space for being outdoors and recreation. The PRC is focused on adding services but also it will update the Parks Master Plan. The Budget allows for money for the PRC to determine how to spend Parks money. There are several subcommittees that are involved in parks and the amount in the budget from all these groups is subpar compared to the requested amount. The General Fund does not provide nearly enough money for parks. This year asks included (but not limited to) resurfacing/improvements to the Skate Park, reconstruction of the Hebert Memorial Plaza, development of the whole Riverfront Park area, adding an additional dog park, planning for an athletic (baseball/softball) complex, rehabbing the kitchen at the City Park, and many other activities. Instead of me recommending a specific activity to be funded, the budget contains the max amount that can be funded to parks without compromising other programs that are funded in the general fund.

This is year one of a three-year period and will lay the groundwork for completion of the goals of the Sheridan Strategic Plan. The Sheridan City Council has placed a high-level of direction of these activities to the City Staff and so the budget addresses getting started and aiming for completion at the end of 2026.

Final Thoughts

This year we should focus on collaboration, which will help us to move forward. These studies must be completed. We need to make decisions and produce results. It is our job to move at just the right speed, balancing a thorough and thoughtful project with progress. This year, I believe will be a year that our hard work will start to become visual especially in our parks system and downtown. Through these efforts, we will see a general boost in the livability factor for our residents and local businesses, which in turn will become a City that has a great standard of living.

It is my wholehearted recommendation that the Council and staff work together, embracing a community spirit that is contagious throughout our community. It takes the full commitment of Councilors, Budget Committee Members, and City leaders to educate yourselves and to educate the public about this budget.

Thank you for taking your time to review this message. Please let me know if you have any questions or comments; I am always happy to be of service.

Fund 20: Sewer and Stormwater

Fund 30: Streets

Fund 40: Water

General Fund

The General Fund provides funding for several programs including administration, police and dispatch, municipal court, code enforcement, legal services, economic development, and library. The principal sources of revenue are property taxes, franchise fees, and the City's share of State revenues.

Revenue Highlights:

Property Taxes: Sheridan's permanent property tax rate is \$2.1307 per \$1,000 of a property's value. The assessed value of Sheridan for fiscal year 2023-2024 was \$289,220,407. This budget assumes that 8% of the taxes will be uncollected. Total collected is estimated at \$520,000.

ARPA: This fiscal year another significant funding source is the federal American Rescue Plan Act (ARPA). The Council is committed to spending these funds on the surface improvements for Sheridan Road. Remaining ARPA funds are \$1,344,524.

Franchise Fees: Franchise fees are charged for utility companies to use the City's right of way and we are estimating to collect roughly \$392,800 in franchise fees.

Donations: There are lines in the General Fund budget, which allows the City to accept donations. People who reserve the park shelter will have the option of donating their \$20 park key deposit back to the Parks. Also, we added donation lines for Dog Parks and Athletic Complex Park. This will allow individuals to track donations. The other is to allow people to make donations to the Sheridan Library.

Fines: There are library fines and court fines that the City collects. Library fines are not a strong source of revenue and there is a national shift away from charging them.

Sin Taxes: Cities revenue payments from five different shared revenue programs through the State, most are based on population. Four of them contribute to the General Fund, the other is gas tax and is collected in the Street Fund. For details on how these are calculated please reference the League of Oregon Cities *State Revenue Report** on their website.

Sheridan's population that is certified by the Portland State Population Research Center is 5,987. Our population is decreasing. The League of Oregon Cities estimates that cities will receive .71 per person for cigarette taxes, which continues to shrink. State liquor tax is estimated at \$21.24 per person and this year is slightly higher than last year's collection rate. It is important to remember that these are just estimates and to calculate these numbers conservatively.

Marijuana tax revenues are estimated were reduced due to the enactment Measure 110. This measure changed how marijuana taxes are distributed. Currently, cities that opted-in to allow for marijuana in their borders split 10% of the tax. This comes to an estimated \$1.38 per person.

Find the full report here:

<https://www.orcities.org/application/files/7317/0726/5239/2024SSRFullReport.pdf>

The City has several properties that could be sold this year, which are accounted for both as a revenue and expense of \$300,000 in the Community Development line. This allows Council to make the decision if they use the revenue to purchase/do something.

Expenditures:

Personal Services: The City Council is responsible for setting the salary schedule, which is also adopted by the Union Contract. The City Manager salary is adopted by a separate contract. All positions in the City are paid out of a combination of multiple funds.

Materials and Services: It is worth noting that in the 2022-2023 Budget the *City Hall Program* was merged into the *Administration Program*. I am hopeful that this reduces confusion about what costs are incurred at City Hall. *Dues/Memberships* merges together all the outside memberships or dues that the City pays.

Legal Program: The Legal Program pays for the municipal court judge contract. It serves as a pass-through for the court fines that are collected from citations and moved to either the state or county for their share of the fines. It also pays the administration fees for legal services.

Park Program: There is a large emphasis being placed on the park system again this year. With the renewal of the Parks and Recreation Committee, there is a lot of enthusiasm and volunteers pitching in to make a positive difference in our park system. The Park SDCs are being spent down to support the Hebert Memorial Plaza restoration. The Park and Recreation Committee asked for over \$500,000 for park improvements and growth, but instead they are budgeted \$280,000 and will need to decide as a Committee and with the aid of staff to figure out how best to spend it this year.

Police Program: The costs for this program continue to rise, mostly due to the Yamhill County Sheriff's Office union contract. I predict that by next year the cost of the police contract will inhibit the ability for the General Fund to sustain the same level of services for the other programs (see above). The Council will need to address how to offset some of the police contract costs, since they are more than the amount of property taxes received. With the focus of code enforcement, the amount of code abatement money was increased to be used for programming and abatement activities by the new Code Enforcement Officer.

Sewer Fund

The Sewer Fund collects fees for the operation and maintenance of the sewer collection and treatment processes. The Sewer Fund is an enterprise fund, meaning it is self-supported through the collection of customers' sewer bills.

Revenue Highlights: The Sewer Fund's principal revenue source is the collection of monthly sewer bills. There are approximately 1,540 sewer accounts comprised of residential, commercial, and industrial users. In this mix, apartment buildings and the FCI are counted once, although they have multiple sewer units.

Included is grant money for the engineering and design work for a large sewer project that is near the City Park on Yamhill Street. It will upgrade the sewer line, which is a major collector, and reroute the sewer to the Sewer Plant, which is on the opposite side of the Yamhill River. The design and engineering are expected to take the rest of the year and will cost around \$1.8 million. The City received funds for the project at 100%. In the following years will be the construction, and that is believed to also be eligible for grant funding and could be around \$10+ million.

Expense Highlights: Three major expenses this year include improvements to the Sheridan Road sewer line, adding a SCADA system (electronic monitoring), and continuing the infiltration and inflow (I and I program) by relining sewer lines and repairing manholes.

Storm Water

Revenue Highlights: The storm water fee is collected monthly from residents and commercial accounts. For residential accounts it is a flat rate of \$3.50 per month for one EDU. An EDU is an equivalent dwelling unit, an engineered calculation that is based on square footage of impervious surface. Based on this calculation, some commercial and industrial accounts pay more than \$3.50 per month.

Expense Highlight: This budget dedicates money for a much-needed Storm Water Master Plan, which will allow an engineer to help determine the importance of each of the storm water issues that continue to be problematic in the City.

Street Fund Details

The State Highway Tax Apportionment is the sole funding for annual costs for the Street Fund. This money is collected through gasoline sales and DMV fees by the State and then divided up amongst governments in Oregon depending on population size. The Street Fund budgets for repair, maintenance, transportation operation, and lighting of the City's streets, roadways, parks, and parking lots. City Streets do not include Main Street, which is a State road. Also, there are several other smaller streets that are either under the jurisdiction of Yamhill County or in a Homeowners Association and the City does not provide maintenance.

Revenue Highlights: Highway funds can only be expended as per the regulations stated in Oregon Constitution Article IX, Section 3a. The League of Oregon Cities is estimating cities to receive \$79.35 per person. A conservative estimate of \$455,000 is budgeted this year.

Water Fund Details

The Water Fund collects fees for the operation and maintenance of the water treatment and distribution processes. The Water Fund is an enterprise fund, meaning it is self-supported through the collection of customers' water bills.

Revenue Highlights: The Water Fund's principal revenue source is the collection of monthly water bills. There are approximately 1,526 water accounts comprised of residential, commercial, and industrial users. In this mix, apartments, manufactured home courts, and the FCI are counted as one account, although they may have multiple water connections and large consumptions.

There are two grants that the City has received that will benefit the Water Fund. The City received \$1,000,000 from Yamhill County for a waterline loop project that will build a water line to connect south Jefferson Street by boring under the railroad track to Sheridan Road. This project will continue through this coming fiscal year. This will bring a higher quality of water to our customers in this area and boost fire flow. The City also received \$185,000 from Yamhill County for a Water Master Plan that will be completed by an engineer and finished this coming fiscal year. The Plan will layout the needed infrastructure (and address other issues like emergency management issues) for the next 20 years to handle growth.

The City applied for a Point Water Source Protection Grant, and this will allow the City to work with commercial and industrial businesses that are near the Yamhill River to study the potential contaminants in the River. The City gets its drinking water for a few summer months from the Yamhill River. Secondly, the City is hopeful of getting a grant to do a Stoney Mountain Facilities Study to cover some of the engineering costs. The grant would be \$50,000 but would not be quite enough, so additional funds are dedicated in the engineering line to pay for what the grant would not cover.

| Total FTE | 17.1 | 24.0 | 25.2 |

STATEMENT OF CHANGES IN ACTIVITIES and SOURCES OF FINANCING *

There are no changes in the accounting method from the previous year. Revenues Highlights include anticipation of two grants for the Water Fund. The General Fund will concentrate on park improvements including a dog park, adding equipment to the South Side Park, and to the Monroe Street and Plaza Park areas. The Water and Sewer Funds will pay for architect drawings for a new maintenance shop and split the cost of several heavy equipment and vehicles. The Sewer Treatment Plant and the Water Treatment plant will get a modernized monitoring system. That Sewer Fund will pay for a Storm Water Master Plan and Sewer Facility Plan. The Street, Water, and Sewer Funds are budgeted to share for the improvements to Sheridan Road.
